LEMON Explore!

Our mission is to help children discover the world. At Lemon we like all seasons of the year. We know very well how to get ready for them. We support the natural activity of children who love to play outside and are in constant motion. The best fun is outdoors. All of our jackets, outdoor trousers and winter jumpsuits are waterproof and windproof, but breathable at the same time.

LEMON’s outerwear is designed so that the child, who is properly dressed (in layers), would feel comfortable in it even at a temperature of minus 30°C.
ADVANTAGES:

• protection against moisture and wind thanks to the use of latest technologies
• the child’s comfort is ensured by the breathable ThermoTex material
• TEFLON or DWR coating additionally protect against dirt
• durable zippers do not get stuck and do not change shape even when frequently used
• main zipper is protected from wind by front pleat that has additional velcro closure
• durability and reliability in all conditions are ensured by high a quality, durable material and reinforced knee panels
• water proof and wind proof properties are additionally reinforced by the taped seams
• up to size 92 lining fabric is made completely out of 100% cotton and it is very skin friendly for small children
• delicate Velcro won’t damage the scarf or gloves
• top zipper cover protects chin
• reflective elements are carefully placed on the garment to ensure better visibility and safety when it’s dark
• filling is made from warm, hypoallergenic, flexible ActiSOFT padding
• precise fitting is made easier thanks to sleeve velcro adjustment and additional elastic cuff at the wrist
• special snow skirt prevents wind and snow from getting under the top part during winter games
• detachable hood with additional elastic will not fall off the head even during strong winds
• functional pockets for favorite trinkets
• comfort thanks to modern and functional shapes
• fashionable style, thanks to designing accordingly with the latest trends
**THERMOTEX**

To make sure that your child is warm, dry and properly protected during outdoor games and activities, we use the THERMOTEX outer fabric. Breathable outer fabric THERMOTEX moves excess moisture to the outside, but does not allow water, cold or wind to enter. ThermoTEX can be divided into three levels:

**ThermoTEX Light:** 1000 mm / 1000 mpv. These parameters allow the child to safely spend time outdoors, even during a light rainfall. The child will stay dry after passing a short way to school or to a stop.

**ThermoTEX:** 3000 mm / 3000 mpv. These parameters allow a child to safely enjoy the outdoor winter madness for a reasonably long time. The same parameters are applied to fabrics which are used for outdoor jackets and tents.

**ThermoTEX Extreme:** 5000 mm / 5000 mpv. These parameters allow a child to safely enjoy the outdoor winter madness for a maximum amount of time. In addition, the clothing has taped seams that enhance water resistance and windproofness. These properties can be found in specialty functional clothing.

**ActiSoft**

Modern technology ActiSOFT padding has unique varying structure polyester fiber construction. Due to this characteristic it is possible to keep proper isolation and heat balance regardless of wearing conditions. Parameters of the padding allow it to be repeatedly washed and dried without any influence on its properties.

**DWR (Durable Water Repellence)**

Protective coating that repels dirt and water. Damp dirt can easily be wiped off with a cloth and dried mud can be cleaned with a brush. The necessity of washing is reduced which good for the environment.

**TEFLON**

The best protective coating which gives clothing dirt and moisture repelling properties. It makes the fabric resistant to wetness, splatters and dry dirt. Damp dirt can easily be wiped off with a cloth and dried mud can be cleaned with a brush. The necessity of washing is reduced which good for the environment.
